

Education for 5 to 6 year old children

Published: 09.08.2020.

The goal of preschool education program is to promote well-rounded and harmonious development of preschool age children as well as mastering of skills and knowledge necessary for individual and social life by taking into consideration the individual peculiarities and needs of the child when preparing children for mastering the basic education program.

Within the framework of Social Security Network Strategy the education is offered to 5 and 6 year old children, working up the subject standards and programs for preschool and primary school according to the children's age and providing the salary to educators employed in teaching 5 to 6 year old children.
